Jim Donovan, Jacob LaGesse, Caleb Wilcox, Yilong Yuan

Identified Changes to be made:

- -Change Tab Title from "Vue App" to "Augur"
- -Potentially add an icon to the Tab as well (Thinking chaoss' icon would be nice there)

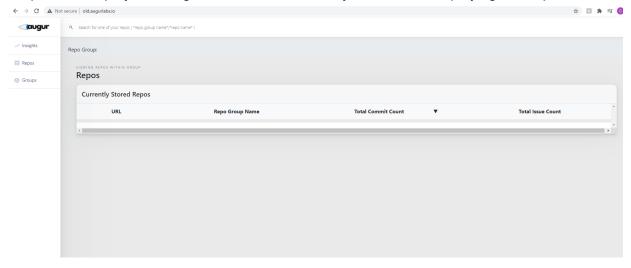

-Groups Tab does not correctly redirect to Repos Tab when a group is clicked on (Depending on user, either takes 3 clicks to get through, or never redirects) (Pictured is an error that pops up every time a group is clicked on in the console)

```
3 ▶ Uncaught TypeError: Cannot read properties of
                                                  embed.js:209
 null (reading 'contains')
     at HTMLDocument.<anonymous> (embed.js:209)

  ▶ Uncaught (in promise) Error: vue-router.esm.js:2065

Navigation cancelled from "/" to "/group/chaoss/overview" with
a new navigation.

```

-Repos Tab displays nothing when clicked on directly, rather than displaying ALL repos

-Insights does not properly display the 1000 day period, but rather only displays the anomalous time, which does not have context to show why the period is an anomaly (Example: In chaoss/grimoirelab, it says that there is a sharp decrease in code changes, and shows the code changes after the sharp decrease, but does not show what it decreased from, therefore making the graph somewhat useless)
